

COURSE

Fibredontics – the future of dentistry

WHERE/WHEN

Monday, 5th July 2010, 09.00 – 17.00 (Registration 09.00 – 09.15)

David Dunn Suite, Addenbrooke's Hospital, Cambridge

This exciting one day hands on course shows participants the many advantages of fibre reinforced, minimally invasive dentistry

DENTAL MEETING

Speaker: Dr J van Rensburg – special interest in Fibre reinforced composite restorations

The Learning objectives & anticipated outcomes:

To empower dentist to provide cost effective, metal free aesthetic, adhesive and minimally invasive dental treatments to their patients through technologically advanced materials and techniques

Delegates will learn how to:-

- Splint periodontally compromised teeth as part of a comprehensive periodontal treatment plan
- Construct an anatomical post directly in the mouth. Filling the root canal completely with fibres
- Place an anterior direct fibre bridge on a well designed fibre frame – an excellent and reliable alternative to the conventional Maryland bridge.

The following topics will be covered:-

- Patient selection, design principles, periodontal splinting, or the space maintainers, or the permanent retainers, trauma splint, direct bridges and reinforcement of composite fillings and many more topics

Course Summary:-

Fibredontics – The Hottest new topic in Dentistry. A cost -effective treatment option in the current economic climate. It will provide excellent aesthetic results and will enhance your work satisfaction and build your practice

Participants need to bring their own Curing lights

Numbers are strictly limited to 12 delegates

Section 63 Approval has been given for **6 hours**. There will be a cost of **£100.00** per person

Unless you hear further, your place is confirmed on the course. Your application will not be acknowledged.
